

PHYS-S12: Introduction to Digital Fabrication

You are cordially invited to the end of semester open house for the Summer School course *PHYS-S12: Introduction to Digital Fabrication*:

Thursday August 8th, 3-6pm
Science Center (1 Oxford St) Room 102

Students will be showcasing their work from the summer semester, including skills like molding and casting, sensor fabrication, CNC machining, microcontroller programming and 3D printing. Their individual final projects synthesize the skills they have learned; examples include wearable electronics, an automated garden and a self-driving trash can. Please join us for an open house with light refreshments and informal presentations.
